---	---	---

Brief description of the Transnational cooperation:

1. Problems to be solved (justification of the need of the transnational cooperation)

..

UMiA (Young People's Mobilisation Towards work and Labour Market) is a project in which the Social Insurance Agency, Employment Agency, Municipalities, and health Services, along with user organisations and employers (Business life), should have a consensus based on the individual needs and which players take joint responsibility for the entire process from a holistic approach. Consideration should be given to project participants' life situation, needs, motivations and circumstances. The target group is around 950 young men and women with disabilities. Many in the target group are people with psychiatric or neuropsychiatric disabilities. The project aims to give the target group more empowerment through more involvement in achieving higher employment / supply capability. To support, customization and collaboration they must support themselves and believe in their capacity to get a job. The project will operate in the north of Stockholm

2. Objectives to be achieved

- Barriers is today stopping people with disabilities from participating fully in society. One important barrier is how to enter the labor market. We would like to learn and share good experiences from other counties how to involve employers and business and how to extend the social economy.
- In order for all people with disabilities to be able to shape their own life's, general support needs to be complemented with customized support and service. We need to see the individual!
What experiences of good practice exist in other European countries regarding empowerment?

3. Main transnational activities (as provisionally planned, to be confirmed with partners)

- Target group (Participants training in other countries)
- Co-workers meetings and collaboration together with other projects
- Managers meetings and collaboration together with other projects

³ See definition by size on Europa : http://ec.europa.eu/enterprise/policies/sme/facts-figures-analysis/sme-definition/index_en.htm

- Executive managements meetings and collaboration together with other projects

4. Planned outputs, deliverables, results of TNC; expected outcomes (effects)

Learning and sharing of good practice

Disclaimer: by sending the completed Project fiche, you agree for publication on the National Supporting Institution web site and dissemination to potential transnational partners for the purpose of effective implementation of transnational cooperation projects.
